1. The amended title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. See MPEP 606.01.
2. The abstract of the disclosure is objected to because it should be descriptive of the newly claimed invention. Correction is required. See MPEP § 608.01(b).
3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Strubbe et al.

The picture-in-picture television system of Strubbe (noting Figs. 1 and 2) comprises a main A/V means (main picture display MD as shown) that presents A/V programming, and an auxiliary A/V means (insert display PD) for presenting programming different from that made on the main display. A cyclic detection state (carried out by channel- up or channel-down scanning, noting remote 37 in Fig. 2) can be applied to the insert display to detect available programming, wherein a preparation for reading and starting programming in a receiving terminal 31 is
